

Michael “Mike” Vahling is a Senior Engineer in Honeywell Aerospace’s Global Repair and Overhaul Engineering (GROE) organization in Phoenix, Arizona. GROE drives development of new repair technology used on defense and commercial applications to extend service time of fielded components.

With a Masters in Materials Science Engineering and experience in Honeywell’s OEM Materials Advanced Technology group, Mike is responsible for the characterization and substantiation of new materials and repair technologies.

The Honeywell GROE team develops and deploys innovative and novel repairs to its repair network allowing repair and reuse of components which may no longer be available for procurement while also driving reduced repair and overhaul cost.
