

Richard Taylor is a consultant for the University of Dayton Research Institute supporting the Air Force in areas of product support and sustainment engineering.

He received a BSEE from Wright State University in 1993.

Mr. Taylor is a retiree of the Michigan National Guard and Federal Civil service.

During his Civil Service career he spent 13 years as full-time technician in Army Aviation, 25 years with the Defense Logistics Agency (DLA), 3 years as Engineering Support Program Manager over OSHA's equipment calibration lab and 2 years at HQ Air Force Materiel Command.

Currently he advises on such Air Force policies as engineering support to DLA, First Article Testing, Pre-award qualification, and Obsolescence.
